• Traditional Students - 4637

• Virtual Students - 1194

• Total Enrollment - 5831

• * Remote Learning - Students (9/3/20) 162

• ** COVID-19 Positive Cases (Students) 3

• ** COVID-19 Positive Cases (Teachers) 1

COVID-19/ACS Health Statement: Thank you for your patience as we take measures to reduce the spread of COVID-19 among our students, faculty, staff, and parents. We are confident that our illness prevention measures, cleaning protocols, and transition of students to Remote Learning (when deemed necessary) will help us in our efforts to minimize the impact that COVID-19 has on our students, faculty, staff and parents. We encourage everyone to continue to do their part by following guidelines established by the Centers for Disease Control and the Alabama Department of Public Health.

* Remote Learning – The Alabama Department of Public Health (ADPH) has established guidelines for preventing the spread of COVID-19 in their Back to School Toolkit that was published on August 24, 2020. A major step in prevention of the spread is to transition students who are in close contact [closer that six (6) feet for longer than fifteen (15) minutes] with someone who has shown one major symptom, described by the ADPH, to Remote Learning. Transitioning to Remote Learning does not indicate a positive case of COVID-19. It is another method used to prevent the spread of COVID-19. It will not be uncommon for students to temporarily move from Traditional to Remote Learning when deemed necessary.

** COVID Positive Cases – All confirmed positive cases of COVID-19 have been and will always be addressed promptly and carefully by Albertville City Schools. Our team of educators will rely on the ADPH Back to School Toolkit and the Centers for Disease Control to guide our steps. All positive cases of COVID-19 will be quarantined until he or she can safely return to school and/or school activities.
